## EXETER TOWNSHIP FIRST RESPONDERS HOME & BUSINESS ADDRESS SIGNS

The standard panel is two sided reflective blue no-rust aluminum and measures 6"x 18" with contrasting white reflective 4" numbers. The preferred mounting method is to have one double-sided sign visible from both directions on the approach to your home or business. The most typical use is to attach it to the front of your mailbox post or it can be mounted on a separate post. If your home or business property is located on a private lane which you share with others, it is highly recommended to post an address sign along the road/highway and one at your building on the private lane.

This is a safety project of the Exeter Township Volunteer Fire Department Junior Firefighters. The donation is \$20.00 per sign.

Number of address signs you are ordering: \_\_\_\_\_

How will the sign be mounted:                      Vertical                      Horizontal

Do you need the numerical address on:                      One side                      Both sides

Name:	
Address:	
Phone number:	
E-mail address:
